

TotalAccess enables you to keep your sales force and mobile employees productive while allowing them to take learning activities and access knowledge resources when disconnected from the organisational network. Seamless synchronisation allows your employees to easily switch between online and offline modes, keeping data easily accessible and current.

Easy to use for immediate productivity

- Consistent user experience with identical displays whether in offline or online course launch
- Easily accessible with flexible downloads direct from the server, from a CD or shared network location
- Support for any SCORM 1.2 conformant and LCMS courseware enables users to launch courses when disconnected from the network
- Automatic synchronisation with a noninvasive and self-maintaining player on the client

Seamless data synchronisation

- One-click downloads to the laptop and uploads of complete results to the server
- Accurate, up-to-date view of progress and results

- Automatic synchronisation of results of course progress and test results after a user connects to TotalLMS™
- Optimised synchronisation capabilities enable fast transfer of data over low-bandwidth connections

Efficient administration and security

- Built-in security for registration and approval processes are enforced before a user can download or launch offline content
- Ability to enforce e-commerce payments before offline content launch
- Selective enablement of offline courses to control availability of offerings
- User security is protected with encryption for course progress and test data files stored on the user's hard drive. Additional security is provided with secured socket layers (SSL)
